Title: Clean Up week 2025

Release by: Lincoln Public Works

Contact Numbers: 794-6658

May 12th through the 15th are the dates for this year's clean up week. The Public Works Department will be picking up materials that have been placed roadside and transporting them to the Transfer Station. Since the crew will not be traveling on private roads those residents living on private roads are encouraged to bring their materials to the nearest Town or State Road for pick up. Items that are within the Town or State right of way will be considered as items to be picked up. If you have a large or bulky items, please call the Public Works Department in advance so we can arrange for a piece of equipment to assist with the loading. If residents have any questions regarding items not on the list, please feel free to contact the Lincoln Public Works Department at 794-6658.

Public Works Director Dennis Bullen said this event is one that many residents have utilized in the past. It's a great way to have that large or bulky item picked up curbside and transported to the transfer station at no cost. During the week we will have multiple trucks picking up materials. Don't be alarmed that a truck may have just passed your house without stopping: the truck might have been carrying mostly metal and the material that you placed roadside might be wood debris. Don't worry the truck picking up wood debris will be there shortly. Please keep clean up week materials separate from your house hold trash.

The following is a list of items/materials that will be rejected:

- Refrigerators & air conditioners
- Tires
- Household waste (trash)
- Junk automobiles
- Cement blocks or bricks
- Gasoline, oil or antifreeze
- Fluorescent bulbs
- TV's and computer components
- Fuel tanks
- Shingles & sheetrock
- Pressure treated wood

The following is a list of items we will be picking up:

- Large items such as swimming pool liner, carpets, tarps, linoleum, insulation and plastic pipe (these items must be cut up in 3x3 sections).
- Vinyl siding needs to be cut up into 3ft sections
- Leaves must be placed in plastic bags or bi-degradable leaf bags. Bags containing excessive amounts of sand will not be accepted.
- Brush and wood debris cannot be larger than 8 inches in diameter and no longer than 4 ½ feet and needs to be free of any metal.
- We will pick up two dump truck loads of brush per household. One load is described as a pile six feet wide by ten feet long and five feet high.
- We will also be picking up one load of demo wood such as boards, plywood and chipboard from each resident.
- We will also be picking up appliances such as washers and dryers, kitchen stoves, dishwashers and any furniture. Many of the items we think might still be usable are placed on the take or leave pile at the Transfer Station for other residents to reuse. If you remove an item from the take or leave area, please do not place that item back out for road side pickup.

The following is the schedule for Clean-Up week 2025

Monday 5/12

The PWD will be picking up items from the intersection of Transalpine Road and the Enfield Road to Evergreen Drive. This area includes all streets in the downtown area including West Broadway to the intersection of River Road, and Main Street through Evergreen Drive.

Tuesday 5/13

The crew will be picking up items on the Transalpine Road and the Lee Road area including all the side streets in these areas. This includes the Half-Township & Curtis Farm Road, Phinney Farm Rd, Folsom Pond Road areas.

Wednesday 5/14

The crew will be picking up on the Enfield Road and the South Lincoln areas including West Broadway South from the River Road intersection. Residents living on the Millet Mallet Road will need to bring their materials out to the Enfield Road for pick up.

Thursday 5/15

We will be in the North Lincoln area including all Town roads that are in that section of town. Please call the Lincoln Public Works at 794-6658 before 12:00 noon on Thursday if your materials have not been picked up as of this time.

We will start the week with most of the PWD staff participating, but as volume decrease many of the employees will be shifted onto other jobs. In years past we offered this service to residents for an entire week, but we have scaled down this program because of increasing operating costs, we now schedule certain days for each area of town. Please have your items out on the day the trucks are scheduled to be in your area to help us reduce the expense of this program. The crews will be starting up at 7:00 am each day so have your items out the night before to ensure the items are picked up.

This schedule is subject to change depending on the volume of materials that are placed roadside for Clean-Up week.
